

I want to let you know how much I enjoy satatlite radio, getting it has improved my life. I love music, it just makes my day better. I have a problem finding new and interesting music on the traditional broadcast band and satalite radio fills that void. I also relay on it for local traffic and weather reports. I use satalite radio in addition to AM/FM radio and still continue to support my local public radio stations with my contributions. It is great when technology can help improve your everyday life experiences and satalite radio does that and more.
